

## WEBSITE LOCALIZATION

Whether you do business locally, nationally, or worldwide, your Internet presence is a key information resource between your company and your clients.

We will localize your website content in a variety of file formats. We can directly localize HTML, HTM, SHTML, PHP, JSP, ASP and ASPX pages. Whichever format you prefer, or if you are unsure how to proceed, we will be glad to work with you or your website designer/host to find the best possible way to approach your specific translation project.

Our core web content services include:

- Free pre-project technical consultation (Please call 1-800-454-3044, or send your questions to [info@3rdevent.com](mailto:info@3rdevent.com)).
- Complete localization services for the following webpage file types: HTML, HTM, SHTML, PHP, JSP, ASP, ASPX.
- Complete localization for data-based content in XML, SGML, or spreadsheets.
- Translation of content provided in other common office application formats, such as MS Word, MS Excel, MS PowerPoint, MS Publisher, MS Visio, MS Works, Word Perfect, PDF, etc.).
- Translation of non-editable content in formats such as PDF, JPG, TIF, BMP, GIF, etc.
- Complete localization for editable image files in formats such as Flash, CorelDraw, Freehand, Adobe Illustrator, Adobe Photoshop, etc.

Contact a 3rdevent representative to learn more about our professional website localization services, or call us at (USA) 1-800-454-3044 (INTL) 312-239-8860.
